https://github.com/p3l6

Experienced Software Engineer developing for MacOS & iOS, as well as Full Stack Web. Expertise with debugging, problem solving, and solution design architecture. Punctual communicator, patient, and thrives on a fully remote team. Mentors and assists teammates in their professional growth. Always open to new technologies: mindful of which tool is best suited for a task.

—— SOFTWARE SKILLS ——

- Swift, Objective-C, Python, Typescript
- C++, C, Java, LaTeX, Markdown
- Shell, Git, make, CMake, Redmine, Jira, Jenkins, Gitlab, Heroku, CircleCI
- OpenGL, Cocoa, GNUstep, iOS, Docker, Thrift, GraphQL
- Matlab, Vapor, React, Deno

—— EXPERIENCE ——

Senior macOS Software Engineer

@ Boombox   Jan 2023 - Present

Developed and maintained a cloud file synching application for macOS

Tech: Swift, SwiftUI, FinderSync, Auth0, Github, Jira, Sentry, Mixpanel

- Took over proof-of-concept, re-writing and finishing where needed
- Brought first version to market on initial timeline
- Expanded features while improving code quality
- Took lead for project management and release cycle, planning for upcoming initiatives, and managing project backlog
- Designed and implemented a complex file synchronization algorithm
- Worked with backend team to discuss needs of client and improve API efficiency for desktop use cases
- Wrote proposals, technical specs, and research results

Senior Software Engineer

@ Doma (aka States Title)   Sept 2019 - Dec 2022

Full stack web application development for a Title & Escrow platform

Tech: Typescript, React, Postgres, Python, Django, Thrift, Github, Heroku, Azure, Jira, Docker, Kubernetes, CircleCI, GraphQL

- Doma Close for Realtor (Sept 2021 - Dec 2022)
  - Guide technical direction for initial backend of an order status portal
  - Shipped a successful beta release of the order status portal on time, in 1 quarter
  - Architected solutions to work cleanly with legacy systems
  - Worked to improve developer systems and tools, unblocking common issues for teammates
- Athena TPS (Sept 2019 - Sept 2021)
  - Lead development on a document templating service
  - Guide teammates as the team lead for a small team that grew in scope and responsibilities
  - Steer direction and evaluate technology options for greenfield projects
  - Contribute on the cross-team application architecture group, to increase tech cohesion across the organization

- Help newer employees become familiar with codebase and tech stack
- Created a tool to help team track work completed for an asynchronous standup

Senior Software Developer

@ Eggplant (aka Testplant)   Aug 2014 - Sept 2019

Developed desktop software for a suite of functional testing products

Tech: Swift, Objective-c, Cocoa, GNUstep, iOS, Python, C++, OpenCV, Docker, Gitlab, Jenkins, Jira, Git, MacOS, Linux, Windows, MinGW

- Lead feature development, working independently when needed on major features
- Developed cross-platform applications using Objective-c (Cocoa) and GNUstep
- Maintained Jenkins build server and build environments for Mac, Windows, Linux
- Identified and fixed complex bugs and issues, including inside GNUstep
- Migrated linux build machines to Docker images, to increase build stability
- Migrated all svn repositories to git. Frequently the team's go-to person for help with git
- Helped identify ideas and ways to improve the applications, both user facing improvements and internal technical improvements
- Part of an agile development team using scrum practices
- Keep up to date with Apple technologies and trends

Software Engineer

@ QiG Group, Greatbatch Medical   Jan 2012 - Aug 2014

Medical device software development, including user interface, rendering engine, algorithms, data acquisition

Tech: C++, Objective-c, Java, Svn, Git, CMake, Gradle, SQLite, Redmine, OpenGL, Matlab, iOS, WinCE

- Architect, design and implement software for a Clinician Programmer Application
- Maintained a Clinician Programmer device emulation environment on iOS
- Design, implement, and optimize a custom 3D rendering pipeline using OpenGL ES 2.0, Textures, shaders, vertex buffers, etc.
- Co-authored 2 Patents (US9943691B2, US9767255B2), and 2 Patent Disclosures
- Mathematically solve and implement algorithms designed for a Clinician Programmer
- Implement laboratory data acquisition virtual instruments with LabView
- Setup and run equipment during pre-clinical animal research labs
- Maintained xServe, Git, Redmine, Hudson and other internal servers for development team
- Assist in drafting and disclosing intellectual property
- Scrum master for software development team in agile

Software Development Intern

@ QiG Group, Greatbatch Medical   Summer: 2011

Worked with other developers to create an OpenGL-based rendering engine

Boy Scout Canoe Trip Guide

@ Northern Tier National High Adventure Base   Summer: 2009, 2010

Lead week-long canoe trips for groups of scouts.

—— EDUCATION ——

University of Colorado at Boulder   Boulder, CO
Applied Mathematics   Graduated Dec 2011
Minor: Computer Science   GPA: 3.459

—— OTHER PROJECTS ——

Quiz Tracker
- Developed an iOS app for the App Store, to track your score for a game of Jeopardy
- Built entire interface with SwiftUI

nccpipeband.org
- Rewrote website backend using php; including user log in system, user profiles/band roster, user permissions, restricted file access, events calendar
- As webmaster, maintain user lists and site pages
- Re-implemented the website again, using Joomla

Tic Tac Cubed
- Developed an iOS game for the App Store, based on a tic tac toe variant

—— LEADERSHIP ——

Eagle Scout
Boy Scouts of America

- Excellent communication and interpersonal skills
- Ability to perform independently in many situations

Pipe Major
Northern Colorado Caledonia Pipe Band and
Wake and District Public Safety Pipes and Drums

- Lead regular rehearsals for groups of 10-30 musicians
- Set the music to be played in the band, and teach it to members to ensure a cohesive style
- Help others keep their bagpipes in proper working order
- Lead band in parades and competitions

Thanksgiving meal director
First Presbyterian Church

- Organized volunteers and planned meal for 2 years
- Meal served around 350 homeless each year, with over 100 volunteers

—— MISC ——

- Bagpipe Player
- WWDC Attendee
- Mechanical Keyboard Enthusiast
